📖 Blog: Journal - Things I Learned

- 30 Seconds Description:

  Born in South Korea, lived in Japan for two years, and raised in the U.S., I have acquired experiences throughout different cultures and backgrounds. Experiencing various facets of cultures and aspects of people, one of the characteristic traits I could boast about my personality is that I'm able to adapt and climb steep learning curves promptly. These attributes were the key to success at that time and a way to survive among society, schools, and friends. I had to act upon constant alterations. Regardless of how difficult the challenges may be, I will be able to face an issue with discipline performing under high pressure. I expect and welcome challenges and can be a key change agent

👂 Front-end developer who listens and reacts

Hello! My name is EunKuk (Ian) Kim - a front-end developer who loves arduous JavaScript and its immense world

- Developing Web / Mobile Applications using via React, React Native, Next.js

- Writing lines of code with purpose through logical reasonings

- Not just copying and pasting, but pursuing to comprehend the each line of coding

- Attempting to minimize human errors with implementing test driving development

- Consistently urge for challenges and personal growth in the industry

- Ready to take all the constructive criticisms

- Though I may not have graduated university with 4 years of computer science degree, I have completed the boot camp with a mindset of placing all my hearts, time, soul into coding and its core essence

🛠️ Stack

Language

- **HTML / CSS**

Capable of creating a website portal with HTML and CSS adeptly

- **JavaScript**

Comprehends ES6 syntaxes and core essence of JavaScript and able to apply them in real practices

- **TypeScript**

Follow throughs the usage of TypeScript and its principles

General

- Git
- Github
- Slack
- Notion
- Figma
- Discord
- Bitbucket

DevOps

- **Google Cloud Platform**

Managing web deployment via Google Cloud Platform along with load balancer to ease the traffic with either docker or bucket

- **Firebase**

Framework / Library

- **React / React-hooks**

Understands the difference between classical components and functional components. Grasps the concept of what and how Hook (useState, useEffect, useRef, useContext, useMemo) works and its purposes.

- **React-Native**

Capable of creating real applicable IOS/Android applications with React-Native

- **Next.js**

Competent using dynamic routing and getServerSideProps in order for SSG/SSR rendering

- **styled-component & emotion**
- **GraphQL & Apollo Client**

Interprets and can work with backend side's server and network through graphQL and apollo client

- **REST API & axios**

Ability to use and work with backend side's server and network through axios

- **react-router-dom & React-Navigator**

Able to practically apply various libraries into real work both in Web through router-dom and App through Navigator

Proficient using both Authentication and Firestore in Mobile Applications

- **Docker & docker-compose**

Capable of setting docker container with docker provided ID and executing the application within the container

📚 Education/Work Experiences

2022. 04 ~ Current

Buxi

- Produced various new pages based on company's customers with new features
- Refactoring and rewriting of legacy codes (classical components, libraries, and SDKs') along with maintenance
- Involved in creating and planning a new project with MVP

2021. 11 ~ 2022. 01

Code Camp

(Front-End boot camp)

- Vanilla JS, React, Next.js, and simple usage and study of typeORM and PostgreSQL
- One completed personal/solo Project (Web)
- One completed team project (App)

2019. 04 ~ 2021. 04

Matsui America

- Ensured physical inventory are accounted for and adhered in the system
- Forecasted and analyzed inventory levels throughout the warehouse
- Analyzed, traced and documented the cost of shipping and receiving

2017. 01 ~ 2019. 04

Meiko America

2014. 05 ~ 2016. 05

Reserved Officer Training Corps

- Attained the title as a Warehouse Supervisor
- Managed and supervised both warehouse and office members
- Selected to establish and institute Warehouse Management System

2013. 10 ~ 2018. 01

Army Reserve

- Managed and guided Soldiers under massive pressure
- Planned and conducted missions and reconnaissance
- Attained two-year scholarship with Guaranteed Reserve Forces Duty

2011. 09 ~ 2016. 11

Calvin University

- Advised and lead six other trainee soldiers as a squad leader
- Cultivated skills to complete tasks both independently and dependently
- Honor graduate of automated logistics specialist (92A)

- Bachelor of Arts in Asian Studies
- Brigham Young University (Online Japanese)

🚴 Projects

Take a glimpse

Aa 이름	≡ Type	☑ 완료 여부	🗓 진행 기간
GoodNeighbors : Good Change for the World	Team	☑	@December 27, 2021 → January 19, 2022
Woof Shop: Best Affordable Pet Supply Shop	Solo	☑	@November 1, 2021 → February 14, 2022
Toy Project: Emotion Diary	Solo	☑	

🎯 Completed Courses & Growth Trajectory

Completed Courses

- [**FastCampus** - First Step in Coding: All in Package]
- [**Udemy** - The Complete JavaScript Course]

Growth Trajectories

- Computer Science & Algorithm & Data structure
- Typescript
